Confidence & Gratitude

Always Be A Good Mentor

Never Stop Being Mentored

Programming Fire In DNA

Senior Fullstack Developer

2019 - 2023 | Aftermarket Performance Group | Salt Lake City, UT

- Designed and executed migration of 14 web apps from EC2 to ECS Fargate, saving the business 10k/month on AWS spend.
- Co-lead company initiative to unify customer authentication across multiple orgs using Okta, API Gateway, Lambda and Cognito.
- Played a key role in hiring, and transitioning to agile workflows.

Senior Fullstack Developer

2018 - 2019 | Mindedge Learning Inc. / Skye Learning Inc. | Boston, Massachusetts

- Co-lead a two year project with a 6 person team that decomposed a 20 year old monolithic LMS, into 4 independently deployable services. The business asked for value in the form of *cost reduction*, *feature agility*, and *decreased developer onboarding time*, and we delivered.

Senior Fullstack Developer

2014 - 2018 | Ebay Enterprise / Zeta Global | Boston, Massachusetts

- Major contributor to the American Airlines "Buy / Gift / Share" application development. This application went on to be the most successful marketing related revenue stream in the company's history.
- Acted as a platform SME, joining account and sales folks at client on-sites on a bi-monthly basis.

Junior Developer

2013 - 2014 | Ebay Enterprise | Boston, Massachusetts

- Wrote bad code, made constant mistakes, and most importantly, fell in love with programming. eBay: I am eternally grateful for the opportunity you gave me, and the mentors that came with it.
